

SSW 690B Weekly Status Update (one submission per team)

Due Monday by 11:59pm each week we meet in class

Team: *Fithub*

Week Ending: 03-09-2019

Project Status: (Green, yellow, red) *green*

One word assessment of how is the team doing relative to the schedule?

The progress is two weeks behind and the project prototype is under construction.

Red.

Team Status Summary: *Where are we now?*

One or two sentences describing high-level project status and progress.

User-interface, database, video course module are in progress.

Last week's activities by team member:

Yuzhen Zhang:

- *What did I work on? I'm working on the database and flask framework this week.*
- *What did I accomplish? Database saving user registration and other information.*
- *Did I learn anything new this week (due to this project)?*
SQLite, Flask.

Weihan Xu:

- *I'm working on the documents of page jumping and content on each website to define the API we will use.*
- *A static user login and sign up page.*
- *Did I learn anything new this week (due to this project)?*
HTML, CSS, and how to define API which will be used in the future.

Dingtong Wang:

- *What did I work on? I'm working on API, Flask framework.*
- *What did I accomplish? Almost nothing accomplished.*
- *Did I learn anything new this week (due to this project)?*
[*flask-realworld-example-app*](#)

Issues, Risks, and Opportunities:

- *What problems did you encounter and what impact might those have on meeting the project schedule?*

Technical issues:

1. *Flask*
2. *Database.*
3. *Learn JavaScript to make a Dynamic website.*

- *What new opportunities did you discover, if any?*

New opportunities are coming from problems we encountered last week, opportunities for learning new skills.

Action Items/Goals for next week:

Users of the website can view video courses on the website.

Team Goals for next week:

Where do we want the project to be next week?

Integrate individual works together first(including tests).

Individual Goals**Yuzhen Zhang:**

- *What do you plan to work on and accomplish in the next week?*
- Achieve basic function for the video course part's backend.*

Weihan Xu:

- *What do you plan to work on and accomplish in the next week?*
- Finish CSS learning and build a static website which can achieve playing video.*

Dingtong Wang:

- *What do you plan to work on and accomplish in the next week?*
- Keep learning Flask and build the fitness community using [realworld](#).*

Other Comments:

Any other relevant information to help us to manage the project and keep our customer informed and happy.
